### **Wes Crawford**

**President at Infrared Services & Thermal Imaging of Texas, LLC**

I managed the optical gas imaging program for my previous company (ExxonMobil) and we were tasked by the state of MA to do monthly surveys of our facilities. It would have been very difficult for us to manage this out of Houston so we looked for someone in the Boston area that could do the work in our New England facilities. We interviewed companies and decided that Dave Sawyer was our best option. Our company was extremely pleased with Dave's work with optical gas imaging.

January 6, 2016, Wes was Sawyer's client.

This is fantastic. I want to thank you for doing this. I hope to get to the voids when I get back from India. If there are any additional questions I can help with let me know.

Dan

**Rylands Plumbing & Heating Co.**

Hi Dave,

Your service was invaluable. You pinpointed the leak to within one inch. The leak was in the third floor kitchen wall behind the crown molding. A finish nail had passed through the molding and lodged in the cold water line for the kitchen. The pipe had been filled with water for the past seven months without leaking. The nail finally rusted out and began to leak. Thanks to your great service all we had to do was open a 6" by 6" hole in the wall to repair the leak. Without your expertise we would have had to cut holes blindly in the hopes of finding the leak. I have already passed on your cards to fellow contractors and told them how professional you were in the process. I am mailing the check tomorrow morning.

Thanks again for the great service.  
Martin Rylands
